CAMP WESTMORE

Girls Arriving at Magnificent New Camp on Willoughby.

"Camp Westmore for Girls," the magnificent new summer camp on Willoughby lake, six and one-half miles from Barton, is filling with girls, who began to arrive several days ago and will fill the camp by the end of the week.

A Dartmouth college chef with assistants arrived several days ago to get everything in order for serving meals. Various camp officials have arrived and considerable activity is already manifest about the camp. The arrival of the girls has followed the completion of the work on the camps so closely that there was no interval, whatever, in fact, some minor details of the camp had not been completed. One of the chief things being the bringing of electric current for light. Owing to factory strikes and lost shipments of wire the lighting job is not completed, though the wiring in and about the buildings is ready and the poles are up. It only remains to string the wire immediately upon its arrival to bring current to the camps.

Twenty cottages 15x23 feet, with a six-foot porch are ready for occupancy. Each cottage containing five single beds which will be occupied by camps contain a small wardrobe and are open at the top but contain canvas drops for stopping wind and storm and are to be equipped with screens and windows. Each cottage contains two drop electric lights and commands splendid views of the lake and mountains. Bubbling fountains are placed at intervals between the cottages.

A toilet building located midway of the cottages is 25x52 feet and contains eight shower baths, nine lavatories and ten closets. The plumbing is all first class and a boiler is installed for hot water. A large septic tank for the sewage has been constructed and in the top of the kitchen building are large storage tanks for water supply.

The main building which has been constructed is 40x76 feet with a 15-foot piazza across the whole 76-foot front. Here a magnificent view of the entire lake is obtained and this building is the dining room. It contains a hardwood floor suitable for dancing when cleared, and at one end of the room, which contains a large cobblestone fireplace, is a raised platform for camp theatricals. This building is connected with the Peene building, formerly used as garage and stables, in which is located the kitchen, refrigerator room and store rooms.

Camp instructors who have been in other camps all say that Camp Westmore is the finest camp they have yet seen and predict a great future for the place.

Improvements on the bathing beach have begun and the former dump will soon be entirely graded, covered and improved, thus making a much more inviting place for the public.

Where Credit Is Due.

(The following from the Burlington Free Press is of interest to our readers, because it places credit for the splendid work of local customs' officials where it belongs.)
To the Editor of the Free Press.

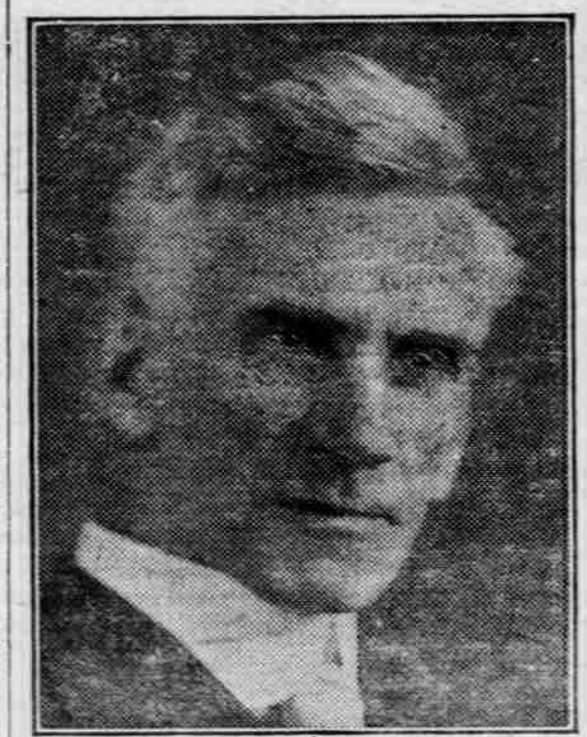

I have read with interest a communication in your issue of the 12th, also of the 13th, in reference to the efficiency of certain officers in this customs district regarding the running down of opium smugglers, and notice that particular credit is given Deputy Collector and Inspector Addison H. King at the head of the Montreal office.

I do not wish to detract from the efficiency of Mr. King as an officer, but I do feel that in view of the articles above referred to the public should know that he had nothing to do with five of the cases recently disposed of in the United States court, and that special credit should be given to Deputy Collectors Stanton E. Hitchcock of Newport, A. H. Butterfield and Harry A. Gilbert of North Troy, and Immigration Officer C. E. Ayer of Newport.

H. C. Comings, Collector.

St. Albans, June 13.

Orleans Chautauqua, July 8-12.

Louis W. Fairfield, Congressman from Indiana, who appears on the fourth day of the Community Chautauqua, has earned the nickname of "Honest Abe," for despite the fact that he is a statesman and college president he preserves that simple democracy that was the chief characteristic of Lincoln. Mr. Fairfield gives an inspiring lecture entitled "Our Heritage—Its Preservation," in which present day problems are discussed in a broad minded and inspiring manner.

Dickens was one of the very first men to enter some of the cities left by the German army after the armistice and one of the first to get into Germany. He told his story in a most interesting manner, relating both pleasing and gruesome incidents.

Work for Both Parents.

It is a tradition that the father should relegate the training of the child to the mother. It is so much easier than to expend the energy necessary to co-operate. But would he with as little compunction permit her to run his business? In order that the child receive a well-rounded training, it is essential for both parents to contribute their bit. What man would enter business without carefully studying the materials concerned, salesmanship, advertising schemes, etc. How many undertake parenthood with as much knowledge and forethought? Neither father nor mother makes much attempt to get acquainted with the problem until it is thrust upon them.—New York Tribune.

Reason for Term "Royal."

Naturally there is a good reason for calling golf a royal game, inasmuch as it was the favorite sport of the kings and queens of Scotland and England, as well as the dukes and earls in ancient times. King Charles, King James I, II, VI, Queen Mary of Scots and others were pre-eminently among the lovers of the recreation.

WILLOUGHBY

Fourth of July in Vermont.

When July Fourth was getting near a feller's days was filled with fear; The Sunday school would have a ride, They said, and then 'twould be denied;

A rumored mountain-climbing trip Was nothing but a lot of lip; But when the preacher, Mr. Grout, Afore the sermon, give it out

There'd be a picnic 'Pendence Day We boys felt better right away.

We knew 'twould be in Walker's woods, Across the brook from Sukey Goode's. She didn't mind, she used to say, How much they heel-marked Walker's boys.

But there was lots and lots to do To put the preparations through; The Grange societies would have to go To give the choir a decent show;

The organ, too, or Inez Spring, Our off-key alto, wouldn't sing.

And first, a scout would go and look To see if teams could ford the brook, And then a gang to mow the brakes And cut the brush and kill the snail;

The teeter board from two to four; Another crew to rig the swings And fetch the drinking water things, And last of all, a special band To build or buy a speakers' stand.

Meantime, the ladies met to see A-what the eating plan should be; Should families have a family lunch, Or should the allies feed the bunch;

If pinkish lemonade was sold The "traffic" sure must be controlled; And then the speakers—Col. Jay, Who came to town to play croquet, Should he be asked, the rich old thing!

Or should the choir jest sing and sing.

The ladies also made it plain The sugarhouse, in case of rain, Would be the only place to 'scape And ought to be a-put in shape;

Now comes the picnic—hear the life! And see the flags all full of life! But I'm as tired as I can be A-getting up this picnic, Gee

It's took so long I'll stop right here And tell the rest another year.—Daniel L. Cady in Barre Times.
